Getting Started with Your Nook using Southern Illinois Libraries on the Go

http://silibraries.lib.overdrive.com

HOW IT WORKS:

Download ebooks, audiobooks, music and videos. Your home library must be a subscriber. You must have your library card number and pin. You can check out up to 5 items. You never have to return anything. No late fees ever.

To see if your device is compatible: http://www.overdrive.com/drc/

ADDITIONAL SOFTWARE:

You can now read in the browser of your computer without installing any additional software. To listen to audiobooks or watch videos, install Overdrive Media Console. To check out ebooks to a Nook install Adobe Digital Editions. A link to both can be found at checkout.

USING A NOOK:

Install Adobe Digital Editions. A link can be found at checkout "Get Software".

To register the software click on "Get an Adobe ID". Select "Don't have an Adobe ID" and fill in the fields on the form. Select "Create" and then go back to Adobe Digital Editions to fill in the Adobe id fields using the email and password you just created.

Check out an ebook. Choose ePub as your desired format and download. The book should open up in Adobe Digital Editions. There are two views, the Library View and the Reading View (button located in upper left corner to switch back and forth). To transfer to your Nook, you need to be in the Library View.

To transfer, plug in your Nook. (You should be in the Library View.) You will see Nook appear on the bookshelves menu located on the left. Click on the book cover that you want to transfer and drag it to the word Nook.

To return early, from Adobe Digital Editions in Library View, hover mouse over book cover. A sideways triangle will appear. Click on the triangle and options will appear.
